## SUMMARY

Motivated and self-taught Full-Stack Developer with strong front-end expertise. I specialize in building responsive and dynamic web applications using React.js, Next.js, and Node.js. Passionate about solving real-world problems through clean code and modern technologies. I started programming in 6th grade, I have over 4 years of self-learning and freelance experience developing interactive and data-driven projects.

---

## EXPERIENCE

### Freelance / Independent Developer

#### Freelance / Independent Developer

2023 – Present

- Designed and built multiple full-stack and frontend projects from scratch.
- Collaborated remotely on small freelance projects.
- Focused on creating reusable UI components and efficient data flows.
- Integrated REST APIs and improved site performance through optimized rendering.

---

## PROJECT

### Single-Page Website

GitHub Link

- Static responsive landing page using HTML, CSS, jQuery, and Bootstrap.

### Auth Fullstack App

GitHub Link

- Full authentication system (register/login/logout).
- REST API with secure token-based flow.

### Text-to-Image Platform

GitHub Link

- AI-powered app converting text prompts to images.

### Dictionary App

GitHub Link

- Word lookup and pronunciation app using dictionary APIs and responsive design.

### Quiz App

GitHub Link

- Interactive frontend quiz built with React.js and API-based question handling.

### Real-Time Chat App

GitHub Link

- Full-stack app enabling real-time messaging using Socket.io, Node.js, Express, and PostgreSQL.
- Authentication, live chat rooms, and clean UI.

### Personal Portfolio Sample

GitHub Link

- Designed with Bootstrap, AOS, Parallax, and Typed.js animations for smooth user experience.

---

## EDUCATION

### Web Praktikum Program

Najot Ta'lim

- Completed practical course on web development fundamentals and modern frameworks.

---

## SKILLS

Node.js, Express.js, REST API, PostgreSQL

Git, GitHub, JSON, Figma (basic), VS Code
